

Based in Abu Dhabi, FLASH Entertainment are the regions premier live events company, with a proven track record in delivering major events and live experiences for all ages, cultures and nationalities. www.flash.ae

Business need:

Flash Entertainment is using O365 for its exchange and has an existing intranet based on SP Online. However the intranet has not seen much employee activity as it is very plain and simple. Compared to their Extranet website the Intranet has a simple out of the box look and feel. The client approached iLink to revamp their Intranet solution in order to increase employee collaboration and activity.

iLink's Solution:

- iLink proposed its next-generation cloud based employee engagement platform built to replace their conventional intranet with a state of the art, fully configurable & social intranet – a platform where employees can innovate, network, collaborate, converse and engage.
- The HUB is an extensible, feature rich, modern UI based solution that can facilitate collaboration across a mobile and flexible workforce. It provides a dynamic space for content and employee interaction, is easy to use and inexpensive to maintain.
- The larger vision and goal of the HUB is to not only improve productivity and make employees more efficient, but also cut through organizational barriers and support new, innovative ways of working.

Benefits:

- A revamped look and feel of the intranet website
- Robust Security through role based access control, 24/7 Availability and seamless scalability provided by O365 subscription based pay-per-use facilities
- Rich Modern UI style with customizable dashboards, rich and immersive reports and intuitive workflows designed to facilitate faster access to data
- Extensive customization and collaboration capabilities that enhance user productivity
- Rich Unified communication platform with built in social computing capabilities and external social media integration

Industry Vertical: Entertainment Services

Technologies:

Key Buying Factor:

- Excellent experience with SharePoint 2013 and SP Online
- iLink's Hub Intranet
- Quick turnaround time
- Cost
